Keymacro enables you to use Windows keys to run any application. This versatile utility makes it possible to carry out various tasks with an extended set of keys without having to open your mouse or switch to another application. With Keymacro, you can: - use the Windows key as a shortcut for opening most of the common software applications, including browsers, office programs, video players, instant messengers and many others; - use the Windows key as an alternative to the control or shift keys, as you can now create shortcuts for most of the program you use the most. - save a lot of time typing because you can perform the most frequent tasks using a single combination of keystrokes instead of typing two or more characters repeatedly. In order to use this software, you need to download the installation package from the link provided on the official website, save it on your computer and run the setup program. DuckDuckGo is a search engine for the Internet that has been designed to be, you guessed it, private. In order to create an encrypted search on DuckDuckGo, you only need to type "ddg yoursearch" on the URL box of the page. This way, you will be able to carry out a search and a private one at the same time. But the most important thing is that all your data will be de-identified and anonymized, meaning that the information you enter on this tool will not be associated with your personal identity. As an added benefit, when you use this search engine, you are not going to be directed to links with inappropriate content. To summarize, DuckDuckGo is a secure and private search engine. You can use it as you do on Google, by typing in "ddg yoursearch" and you will be able to surf the Internet without having to worry about having your personal data exposed. Mr. Icahn's latest bid to buy the commercial bank began on Monday when the hedge-fund manager offered to buy each share of Wachovia at \$15, or \$2.50 a share, nearly 50% below its current market price. The deal, which would have valued Wachovia at more than \$40 billion, fell apart on Tuesday, just a few hours before it was to be announced. Wachovia said on Tuesday that it had determined that its shareholders would have voted against the deal and that that therefore had decided to seek a buyer. That is a major blow to Mr. Icahn's ambitions, but it also appears to have killed any chance that his previous failed attempt to buy Wachovia would somehow come to pass. Mr. Icahn had begun that effort after Wachovia had accepted a large, \$25 billion bailout from the government in 2008. But he was unable to find a buyer for the bank.Tech. Marketing.
