the selection, and change the selection style (typically a light blue color) to make it feel more like an erase-and-paint method. This is actually an old technique, but in this video, you can see how Jim Doherty combined two images to create his new IT Pro business card design. He started by deleting all the other items on the board and replacing them with his own. Then, he used the Clone Stamp tool to select the area of the board he wanted to replace and then used the Erase tool to remove the original items on the board. This allowed him to create a new version of the business card with his own image. Bonus: he also used a color picker and more smarts to make the overall look of the new profession card pop.
